

**GATEWAY
FEATHERS**
An Arrows Best Friend

SHAPES & SIZES

RAYZR

This feather is made with Whisper Quiet Technology. The shape is different from a shield shape because of the angle cut on the back of the feather and all Rayzrs are cut from the thinnest portion of the full length feather! The Rayzr will fly quieter than plastic! Available in: 2" L/W + R/W

PARABOLIC or ROUND BACK

Our parabolic shape is a lower profile shape providing fast accurate arrows. Available in: 1 7/8" R/W, 2 1/2" R/W, 3" L/W + R/W, 4" L/W + R/W, 5" L/W + R/W

SHIELD or SHIELD BACK

The shield shape provides a different profile for increased stability, forgiveness and "Traditional" looking appeal. Available in: 2 1/4" L/W, 3" L/W + R/W, 4" L/W + R/W, 5" L/W + R/W

MAGNUM or BANANA CUT

Magnum is a 5 1/2" feather designed for arrows with larger/heavier broadheads. Available in: 5 1/2" L/W + R/W

BATWING

The Batwing shape just screams "Beautiful Arrows"! If you enjoy building arrows and making your equipment better than the next guys then this feather is for you. This shape is being used successfully by hunters and target archers providing very good arrow spin. Available in: 2" R/W, 3 1/2" R/W, 4 1/2" R/W

CUT SECTION/ FULL LENGTH

Cut Section shapes are used to make Flu Flu arrows which are used for small game and aerial target shooting. The big feather is durable and makes the arrow easier to find.

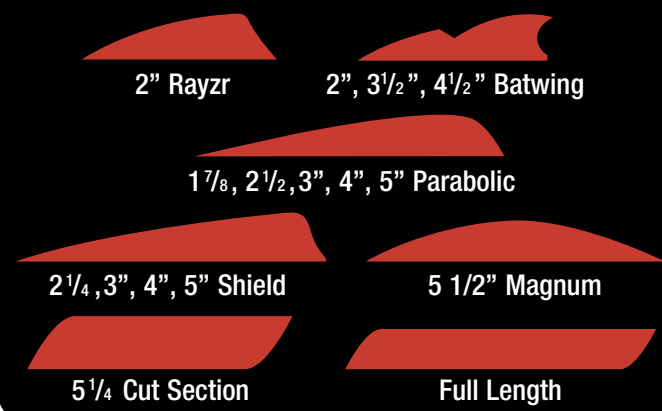

Our full length feathers are used to cut or burn your own favorite shape and size. They can also be used similar to a Cut Section.

Cut Section Available in: 5 1/4" L/W + R/W
Full Length Available in: 8"-12" L/W + R/W

ACCESSORIES

1. Feather Arrow Tracers

Wrap these 2" soft body feathers around your arrow shaft between the fletchings and nock for increased arrow visibility. Tracers add virtually no weight to your arrow.

2. G1 Glue

No drip formula. Sets up fast. Incredibly strong, weather resistant bond. Works with feathers, or if you feel you must, plastic vanes on wood, aluminum and carbon shafts. Store refrigerated! 1-oz. or 2-oz. bottles.

3. Waterproofing Powder

"Remarkable" is how experienced shooters describe their results after applying Gateway's Waterproofing powder to their fletched arrows and shooting in the rain. This non toxic, odor free and weightless powder will help guide your feather fletchings in any weather!

4. Little Chopper

This unique tool allows "do it yourselfers" with the desire for "Specialty" shapes and sizes to cut what they want. There are 11 selections of these choppers in 6 shapes including Pope & Young, The Classic, Traditional, Shield, Parabolic and Banana.

THE NITTY GRITTY OF FEATHERS

SUCCESS WITH FEATHERS!
PRO STAFF PAGE

The most popular feather shape in the US is the **Parabolic / Round Back**. This lower profile shape provides dependable, fast and accurate results. The **Shield / Shield Back** provides a higher profile for increased stability, forgiveness and “Traditional” looking appeal. The **Magnum / Banana Cut** is even more feather for arrows tipped with larger / heavier broadheads. The **Cut Section / Full Length** are made for Archers to design their own shapes and sizes using a feather burner or chopper. The **Rayzr** is a 2” feather made with Whisper Quiet Technology. The shape is altered by increasing the angle on the back of the feather and cutting the Rayzr from a specific location in the full length feather making it the “First Modern Feather for Modern Bowhunters”.

FEATHER TYPES/SIZES				
Size	Available Styles	Target/3D	Hunting	Comments:
1 7/8"	Parabolic	Yes	No	Popular outdoor target feather
2"	Rayzr	Yes	Yes	Very good with fixed blades & Whisper Quiet!

FEATHER SPECS				
Size	Average Weight	Height in MM	Height in Inches	Comments:
1 7/8" Parabolic	0.64 Grains ea.	12.0 mm	0.472 in.	<div>✓ Feathers are 100% Biodegradable</div> <div>✓ Feathers provide maximum arrow control and guidance</div> <div>✓ Feathers will increase your FOC balance point</div> <div>✓ Feathers produce faster shooting arrows</div> <div>✓ Feather bases don't need to be cleaned prior to fletching</div> <div>✓ Feathers are approved for use in all weather</div>
2" Rayzr	1.20 Grains ea.	13.0 mm	0.512 in.	
2" Batwing	1.20 Grains ea.	13.0 mm	0.512 in.	
2 1/4" Shield	1.80 Grains ea.	16.0 mm	0.629 in.	
2 1/2" Parabolic	1.80 Grains ea.	12.5 mm	0.492 in.	
3" Parabolic	2.04 Grains ea.	13.5 mm	0.531 in.	
3" Shield	2.21 Grains ea.	16.0 mm	0.629 in.	
3 1/2" Batwing	2.40 Grains ea.	14.0 mm	0.551 in.	
4" Parabolic	2.76 Grains ea.	15.5 mm	0.610 in.	
4" Shield	2.76 Grains ea.	15.5 mm	0.610 in.	
4 1/2" Batwing	3.15 Grains ea.	16.0 mm	0.629 in.	
5" Parabolic	3.63 Grains ea.	16.5 mm	0.650 in.	
5" Shield	3.63 Grains ea.	16.5 mm	0.650 in.	
5 1/2" Magnum	4.26 Grains ea.	19.5 mm	0.767 in.	

In all situations where broadheads are used, use enough feather to stabilize the arrow, so the broadhead does not guide the arrow. We recommend you always Bare Shaft Tune your arrows to your bow and then either Paper Tune or Walk Back Tune your bow. Always test shoot your equipment safely.
