Gross Weigh	243g / 0.53lb
Max Draw Length	30.42"(77.2cm)

* FF String Included

STRING · SHOOTING

The draw weight marked on the limbs is measured at a 31" standard of Korean Traditional Archery Association.

NOMAD KTB Draw Length

Bow Length	44"	48"	53"
Max Draw Length	30.42"(77.2cm)	31.62"(80.3cm)	33.40"(84.8cm)

KTB Brace height Range 5.5-6"(14-15cm)

1 Attach the bowstring to the top limb tip of your bow. With one hand hold the bowstring in place.

2 Step through your bow and rest the lower limb over your thigh while holding the loose end of the string with your free hand.

3 Pull the top limb forward while bending down toward the lower limb tip. Hold the limb firmly to prevent it from twisting from side to side.

Place the lower end of the bowstring over the limb tip. Check both ends for proper string positioning and step back out through the bow.

4 Find the center of the bow string. Measure 2.5" up. At that point wind with dental floss or thin serving material upward approx. 1/2", two layers deep or to fit the arrow nocks snugly (you will be nocking your arrow on the serving material) then tie off. These bows require a higher than normal nock point.

5 Nock your arrow on the string with the arrow on the right side of the bow. Next wrap your thumb around the bowstring directly under the arrow. Your index finger should hold your thumb and also press against the arrow shaft to help keep it pressed against the bow.

6 Extend your bow arm and raise it above the target. Draw the bow string to a similar anchor position shown above. To release the string simply open and relax your thumb and index finger while continuing to hold tension.

BAMBOO ARROW

- Material** Bamboo(Sinudae), Bush Clover, Pheasant Fletching, Brass Points, Sinew and Glue
- Size** #1 : 30.4inch - 20.6g
#2 : 31.0inch - 22.58g
#3 : 31.6inch - 24.4g
- Nock Color** Navy, Blue, Red, Green, Orange

HYOSHI / WHISTLING ARROW

- Material** Horn, Bamboo(Sinudae), Bush Clover, Pheasant Fletching, Brass Points, Sinew and Glue
- Size** 31.0inch - 47.0g

The arrow below is not a weapon but was used for signaling. The end of the arrow looks like a round ball and when it is flying, it creates a buzzing sound. The sound allowed people to know where the hunt was. The word '호시', beginning means 'crying arrow'.

the source of the text "kid.chosun.com | Fun&Easy Guide : Korea Wall Painting of the Gogyryeo Tomb"

TONG-AH AND PYUNJUN

- Tong-ah Material** Bamboo, Oak wood
- Pyunjun Material** Bamboo(Sinudae), Bush Clover, Pheasant Fletching, Brass Points, Sinew and Glue

It is a shooting tube with cradle and is made of oak wood and bamboo. At the back, there is a ring attached so that you can fit your fingers into it. The lowest part of the cradle is decorated with bamboo and painted red and green with gold ornaments.

The 'Pyunjun' is a short arrow shooting into a basket 'Tong-ah'. The available range of this small arrow is far. It is not easy to keep away from it and it cannot be used for re-shooting. The production method and shooting method of this arrow was a secret all through the Chosun Dynasty era.

NOMAD KTB ARROW

- Material** Carbon Shaft, Brass Point, VaneTec vanes, In-Nock
Size #1 : 30.4inch - 20.6g
 #2 : 31.6inch - 24.4g
 #3 : 32.2inch - 28.1g
 #4 : 33.4inch - 30.0g

Cheonji Arrow

- Material** Carbon Shaft, Cooper Point, VaneTec vanes, In-Nock
Size #1(30.4 inch - 20.6g)
 #2(31.6 inch - 24.4g)
 #3(32.2 inch - 28.1g)
 #4(32.4 inch - 30.0g)

WARNING

An arrow shaft can become damaged from impacts with hard objects or other arrows, or after being shot into a target. A damaged arrow could break upon release and injure you or a bystander.

A damaged arrow should never be fired. You must carefully inspect each arrow shaft, nock and other components before each shot to see that they have not been damaged. Before shooting, place the arrow between your thumb and fingers, and using your other hand to slowly rotate the shaft, run your fingertips along the entire arrow length, feeling and looking closely for nicks, cracks, splits, dents, or other marks that could indicate the shaft has been damaged. If your arrow is crested, inspect for impact damage on the crest surface. If damage is present, remove the crest and inspect the shaft underneath the crest. If shaft damage is present, do not shoot the arrow. Discard the shaft.

BOW ACCESSORIES

KTB BELT(Gungdae)

The KTB Belt(gungdae) is a dual-purpose accessory. When the bow is not in use, the KTB Belt(gungdae) is a bow bag and protects the bow. It is tied around the waist and is used like a quiver while shooting. Arrows are twisted into the KTB Belt(gungdae), points in and nocks out.

HOW TO TIE THE KTB BELT

1. Ready to tie
2. Tie the cover(belt) 1
3. Tie the cover(belt) 2
4. End of line fit
5. Put the arrows
6. Arrangement
7. Ready to use

BOW ACCESSORIES

THUMB RING

Authentic style made from real cow horn.

This deluxe model has a raised ring for the string to lay on instead of against the flesh. Produces a better release and no thumb pain.

Size : 15~24mm

THUMB RING(GENERAL STYLE) | GAKJI

When shooting arrow to easy use chin

THUMB RING(MALE STYLE) | SUGAKJI

It is more effective when using a strong elastic bow
It make to size adjustment because leather pad

BOW ACCESSORIES

GENERAL STYLE THUMB RING | GAKJJI HOW TO USE THE THUMB RING

When shooting arrow to easy use chin

Measure the diameter of your thumb.

The diameter is size of thumb ring.

The thumb ring is elliptical

The thumb is put through the thumb ring from the rounded side at a 90° angle to the thumb.

The ring is positioned just in back of the knuckle of the thumb.

The ring is turned 90°, so that the ring protects the pad of the thumb.

The bow handle is held diagonally in the hand, with the fingers curling in back of the handle.

The string is positioned where the ring and thumb meet.

The index finger wraps around the thumb, similar to flipping a coin. The arrow rests just above the thumb and ring. The index finger will push the arrow into the bow, so the arrow will not fall off, even if the bow is canted upside down.

The bow is in position to be drawn and an initial sighting of the target is done.

The string is drawn straight back until the back of its point touches the bow arm's thumb, with the bow arm straight and the draw arm's elbow parallel to the ground.

To release, the draw hand is simply relaxed. The bow should be held still until after the arrow has cleared the bow.

Tip

There has no 100% exact thumb ring on your thumb. We like to recommend you smaller size than your thumb. It is available to modify follow to your size with sandpaper.

BOW ACCESSORIES

MALE STYLE THUMB RING | SUGAKJI HOW TO USE THE THUMB RING

It is more effective when using a strong elastic bow
It make easy to size adjustment because leather pad

Measure the diameter of your thumb.

The diameter is size of thumb ring.

The thumb ring is elliptical

The thumb is put through the thumb ring from the rounded side at a 90° angle to the thumb.

The ring is positioned just in back of the knuckle of the thumb.

The ring is turned 90°, so that the ring protects the pad of the thumb. Adjust the sizing used the leather pad.

The string is positioned where the ring and thumb meet.

The index finger wraps around the thumb, similar to flipping a coin. The arrow rests just above the thumb and ring. The index finger will push the arrow into the bow, so the arrow will not fall off, even if the bow is canted upside down.

The bow is in position to be drawn and an initial sighting of the target is done.

The string is drawn straight back until the back of its point touches the bow arm's thumb, with the bow arm straight and the draw arm's elbow parallel to the ground.

To release, the draw hand is simply relaxed. The bow should be held still until after the arrow has cleared the bow.

BOOKS

INTERNATIONAL TRADITIONAL BOWS AND ARROWS BOOK

You, Young-Ki, director of Young Jip Bow & Arrow Museum

International Traditional Bows and Arrows of Yesterday and Today by Yoo Young-Ki, director of Young Jip Bow & Arrow Museum.

It's thought that for people living in the Stone Age who created the instruments for living by breaking or grinding down the stones, bows and arrows were not only effective weapons in comparison with the swords or javelins with which they had to personally fight against the fierce animals with strong teeth or sharp claws, but also significant inventions by which they defended their tribal community from the invaders and conquered territory.

KOREAN TRADITIONAL ARCHERY

Thomas A. Duvernay with Nicholas Y. Duvernay

Korean Traditional Archery is a work meant to fill a need for an introductory book on the subject in English. Although there have been several books written on the subject in Korean, none are available in English. This work is not intended to be the final word on the subject; conversely, it is meant to be the first word.

KTB Draw Length

Question :

Hello, I am interested in purchasing a bow. I have novice level archery training, but I would like to ask about bow recommendations. I've noticed Korean bows seem smaller than the ones I am used to, and I am curious about how I would choose a bow based on factors like draw length.

Answer :

The Korean bow is different to other bows, it is small and very strong. There are several varieties of bow length and weight in our online shop. Whether you are a beginner or experienced, we can provide what you need. Usually, we use height and arm length to work out the correct size of bow. The weight can be calculated based on the user's arm strength. If you are a beginner and smaller than 173cm we recommend 48 inch and 35lb. If you are over 174cm we recommend 53inch bow and 35lb

KTB Draw Length

Bow Length	44"	48"	53"
Max Draw Length	30.42"(77.2cm)	31.62"(80.3cm)	33.40"(84.8cm)

KTB Brace height Range : 5.5-6"(14-15cm)

The draw weight marked on the limbs is measured at a 31" standard of Korean Traditional Archery Association.

* Same with KTB Kingdom, Zenith, Black Shadow, Guru Youth Bow
